# Congress of the United States

Washington, DC 20510

July 17, 2012

Shawn Garvin  
Administrator  
EPA Region 3  
1650 Arch Street  
Philadelphia, PA 19103

Dear Administrator Garvin,

We are writing in support of the watershed plan proposed by AMD Reclamation (AMDRI) for Dunkard Creek, an impaired waterway of the Commonwealth of Pennsylvania under the Clean Water Act. This measure is also supported by the Pennsylvania Department of Environmental Protection (PA DEP). Rising mine water from the Shannopin Mine is a threat to the surrounding aquatic environment and local mining activities. This proposal would afford the watershed considerable environmental benefits and allow the mining to continue, which is needed during this anemic economic recovery.

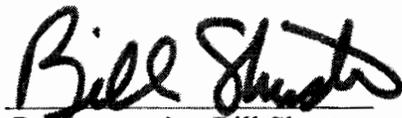

AMDRI has been treating the Shannopin Mine water since 2004, at a cost of approximately \$2 million per year. Dana Mining has paid for 100% of the expenses for these pollution mitigation measures. Without Dana's contributions, these costs would be derived from the taxpayers of the Commonwealth. The proposed watershed plan will build on these successes and accomplish the goal sets forth in the 2007 Dunkard Creek TMDL. In doing so, there will be a net reduction in pollutant loading and an elimination of pollutant sources directly associated with historical fish kills. This is accomplished by the plan's emphasis on the remediation of orphan acid mine drainage seeps which are one of the causes of "dead zones" between the upper reaches of Dunkard Creek and the Monongahela River. Lastly, the proposal establishes a trust fund to ensure the long term treatment of the Shannopin Mine water.

In addition, approving this plan will also mean that over 600 Pennsylvanians will remain employed and that more American energy can be produced. This is a win-win proposition. Rejection of this project would result in a job killing unfunded mandate, which would be unfortunate. We encourage you to continue your cooperative efforts with the PA DEP, AMDRI, and Dana and come to a conclusion as soon as feasibly possible. We respectfully request that you keep our offices apprised of the developments regarding this project. Thank you for your consideration.

Sincerely,

Senator Pat Toomey

Representative Bill Shuster
